AHMAD FA'IDH RIFA'I

KP. Pondok Serut 004/003 Paku Jaya Serpong Utara Tangerang Selatan Banten | ahmadfaidh2003@gmail.com | 088225918480 | github.com/vion-15

I am a Bachelor's degree graduate in Computer Science with a strong interest in software development, particularly in Full-Stack Development and Backend Development. I have been learning programming for 1–3 years and have developed various personal projects to apply and improve my technical skills. I have hands-on experience with JavaScript, TypeScript, React.js, Next.js, Golang, PostgreSQL, and Docker. I have also studied REST API development, database management, and the use of Git and GitHub in the software development process. Some of the projects I have developed include a travel destination recommendation platform, a Point of Sale (POS) application, and a blogging platform. Currently, I am developing backend applications using Golang, PostgreSQL, and Docker while deepening my understanding of database management and application infrastructure. I am a fast learner, have a problem-solving mindset, and am enthusiastic about exploring new technologies through hands-on practice. I am eager to continue developing my technical skills, gain professional experience, collaborate with a team, and contribute to building functional and reliable applications. I am open to entry-level career opportunities in Full-Stack Development, Backend Development, and Frontend Development.

WORK EXPERIENCE

CV. HelloPrint Indonesia **August 2020 - October 2020**

Product Designer & Operational

Responsible for designing product mockups and prototypes, collaborating with the team to translate business requirements into visual designs, using Figma and Adobe Photoshop to create design assets, and forwarding orders to the operations team for further processing.

TOP 3 DEVELOPMENT PROJECT

Tourist Destination Recommendation System (Full-Stack) **March 2026 - April 2026**

Next.js, Golang, PostgreSQL, Python, TailwindCSS, Gin, GORM, Docker, Machine Learning, CORS, REST API, JWT, etc

Developed a web-based travel destination recommendation platform using the Content-Based Filtering (CBF) method and Transformer-based text processing models. Built an interactive user interface using Next.js and Tailwind CSS, and developed REST APIs using Go, Gin, and GORM to handle business logic, JWT-based authentication, and PostgreSQL data management. Implemented a recommendation service using Python, FastAPI, and Sentence Transformers. Developed features including user reviews, recommendation history, an administrative reporting dashboard, and Geographic Information System (GIS) visualization using Leaflet. Integrated Cloudinary for media management and Recharts for data visualization, and used Docker to containerize and deploy the application to a VPS.

Point of Sale (POS) Web Application (Full-Stack) **November 2024 - January 2025**

React.js, Express.js, MongoDB, Node.js, TailwindCSS, REST API, JWT, Midtrans Payment Gateway, Firebase

Developed a web-based Point of Sale (POS) application to manage sales transactions, product inventory, and reporting. Designed and implemented REST APIs using Node.js and Express.js to handle business logic and user authentication. Built an interactive and responsive administrative dashboard using React.js and Tailwind CSS, and integrated the Midtrans Payment Gateway to support online payment processing.

Blog Platform Web Application (Full-Stack) **August 2023 - September 2023**

React.js, Express.js, MongoDB, Node.js, TailwindCSS, REST API, JWT, Firebase, Radix, Google Authentication

Developed a blogging platform supporting CRUD (Create, Read, Update, Delete) operations for article management. Designed and implemented REST APIs using Node.js and Express.js to handle business logic and user authentication. Implemented content categorization and user management features, and integrated Firebase Cloud Storage and Firebase Authentication to support Google account sign-in.

EDUCATIONS

Bachelor's Degree - Universitas Pamulang **2022 - 2026**

Computer Science **3.68/4.00**

TECHNICAL SKILL

Front-end Development, boostrap, Full-stack Web Development, DevOps, Node.js, System Design, next.js, RESTful API, Amazon Web Services (AWS), MongoDB, Machine Learning, Express.js, JWT, Microservice, Paymemt Gateway, Tailwindcss, UI/UX Design, docker, Graphql, React.js, Visual Design, Postman, FIREBASE, Backend Development, MySQL, html + css + JavaScript, Golang, Python, insomnia, PostgreSQL, CORS, Microsoft Office.

CERTIFICATIONS

Programmer **January 2026 - January 2029**

Badan Nasional Sertifikasi Profesi (BNSP)

Javascript Programming **November 2023 - November 2026**

Dicoding

Cloud Practitioner Essentials (AWS Cloud) **November 2023 - November 2026**

Dicoding

TRAINING

Software Engineering (Short Course) **January 2026 - January 2026**

Lingga Cipta Insania
